Locating Insurance Carrier Information

Carrier ID delivers fast access to an industry-leading accident database to help streamline insurance verifications and provide critical details that improve claims processing and minimize fraudulent claims. Carrier ID's unprecedented accident intelligence helps LexisNexis Accurint for Insurance customers quickly verify current coverage and easily identify carriers in uninsured motorist or 3rd party claims.

Search methods include:

VIN only-

Required fields are Claim # and VIN.

Name and Address-

Required fields are Claim #, Last Name and First Name.

Entering the DOL is strongly recommended as it enhances search results.

Results Include: Loss Type, Loss Date, City of Incident, State of Incident, Involved Party, Vehicle Owner, Passenger(s), VIN, Year, Make, Model, Carrier Name, Policy #, Policy Effective Date and Policy Expiration Date

Report Header Section

This section lists personal information about the driver from your order.

Claim #: The claim number that is assigned to the order by the user.

Order ID: The Order ID is assigned to the report by the Accurint for Insurance system.

Account: The account number used to order the report.

Date of Order: The date that the order was submitted.

Date of Receipt: The date that the order was processed and returned.

Recap Section

This section reports any direct or possible hits reported from the Carrier ID search.

Search Request Section

This section includes information provided by the state, or other information supplied by LexisNexis.

Name: The name of the subject returned in the search.

Address: The address returned for the subject includes street, town, state, and zip code.

D/L#: The driver's license number returned for the subject in the search.

State: The state where the drivers license is issued.

DOL: Date of Loss

Direct Hit And/Or Possible Hit Sections

This section reports information related to the search subject. Search results on the date of loss are listed in the Direct Hit Section. Search results outside of the date of loss are listed in the Possible Hit Section.

Loss Type: The type of incident that caused the loss.

Loss Date: Date the loss occurred.

City of Incident: The city in which the loss incident occurred.

State of Incident: The state in which the loss incident occurred.

Involved Party: The name of the person involved in the incident.

VIN: The Vehicle Identification Number of the vehicle involved in the incident.

Carrier Name: Name of the insurance company associated with the search subject.

Policy #: The insurance policy number associated with the search subject.

Policy Effective Date: The effective date the policy was originally written.

Policy Expiration Date: The date the policy ends.
